## EXPERIENCES

### Coding Instructor — Memorial Engineering Outreach June 2023 - August 2023

- Provided coding lessons for young people, grades 1 - 12 (Python, Java, Arduino)
- Conducted cybersecurity and privacy management sessions
- Worked on robotics projects and troubleshooted various apps and systems

### Resident Assistant — Memorial University Residences May 2022 - Present

- Best RA award 22–23 year
- Skills: Leadership, communication, conflict management, first aid

### AI Policy Researcher — Memorial Governance Secretariat January 2023 - June 2023

- Conducted research on the impact of generational AI on academic plagiarism
- Submitted a report and proposed countermeasures for University Policy

### Autonomous Vehicle Researcher — Memorial University May 2023 - Dec 2023

- Conducted simulations to enhance edge computing efficiency in Autonomous Vehicles
- Investigated Ems vehicles, lane allocation, variable speed, and v2v communication

### Professional Photographer — Memorial University November 2021 - August 2023

- Engaged in digital marketing, event coverage, portrait, and architectural photography
- Collaborated with the residence marketing department to create promotional materials

## EDUCATION

### Bachelor of Computer Science, Memorial University June 2021 - Present

- Maintained an 82%+ average in core courses
- Received a 100% International Undergraduate Entrance Scholarship
- Expected graduation - Spring 2025

## TECH SKILLS

**Programming Languages** Proficient: Python, Java, C++, JavaScript. Familiar: C, C#

**Web Development** Proficient: HTML, CSS, Astro, Node.js. Familiar: React, Flutter

**Other:** Arduino, TinkerCad, Unreal Engine, Unity, Linux, TensorFlow, Luminar AI, Pandas, Jupyter, Pygame

## PROJECTS

### Portfolio Website: <http://arunav.netlify.com>

- Designed and developed a personal portfolio website to showcase projects, skills, and achievements
- Implemented using HTML, CSS, and JavaScript (Node.js and React framework) for a responsive and interactive user experience
- Integrated multiple APIs to dynamically import information for enhanced content and interactivity

### Spam Email Classifier (Python, Machine Learning)

- Developed a machine learning-based system to classify emails into spam and non-spam categories
- Utilized Python and various libraries for data preprocessing, feature extraction, and model training.
- Applied (NLP) techniques for effective analysis and classification of email content.

### Ninja Adventures (C++ with SFML/ImGui) - 2D Platformer

- ECS architecture with SFML and ImGui framework on C++
- Features: Dynamic game progression, parallax, swappable weapons, and AI-driven NPCs

### VR Simulation (Unity Engine, SteamVR, Oculus)

- Virtual Reality project designing a scenario with an event chain
- Contributed to world-building, asset generation, and implemented minor functionalities
- Due to NDA constraints, specific details cannot be disclosed
